

Career Summary

Michelle Young

Senior Technical Writer
Content Specialist

[LinkedIn](#)

Introduction

I am a Senior Technical Writer with over 25 years of experience in writing, editing, creating and managing documentation and content for enterprise-level applications in global and government organizations. Throughout my career, I have gained industry experience in various sectors, including mining, software, education, utilities, power, and renewable energy.

I have a strong foundation in traditional writing knowledge and skills, complemented with understanding and demonstrated experience with Open-source, agile, DevOps and modern methods, concepts and tools. I am skilled in content strategy, designing and developing content management systems (CMS), open source methods and version control, implementing and aligning documentation with software development cycles, and designing documentation frameworks to manage and publish to GitHub and Azure projects and wikis. I am also proficient in content renovation, digital transformation, knowledge mining, gap analysis, implementing source control, and managing content as a single source of truth. I have a persona-focused approach and take the time to understand the intent and audience to assist with planning and creation.

My extensive experience includes documenting complex mining applications, ERP software, and abstract software development approaches. mining, gap analysis, implementing source control, and managing content as a single source of truth. I have a persona-focused approach and take the time to understand the intent and audience to assist with planning and creation.

Skills and Demonstrated Experience
